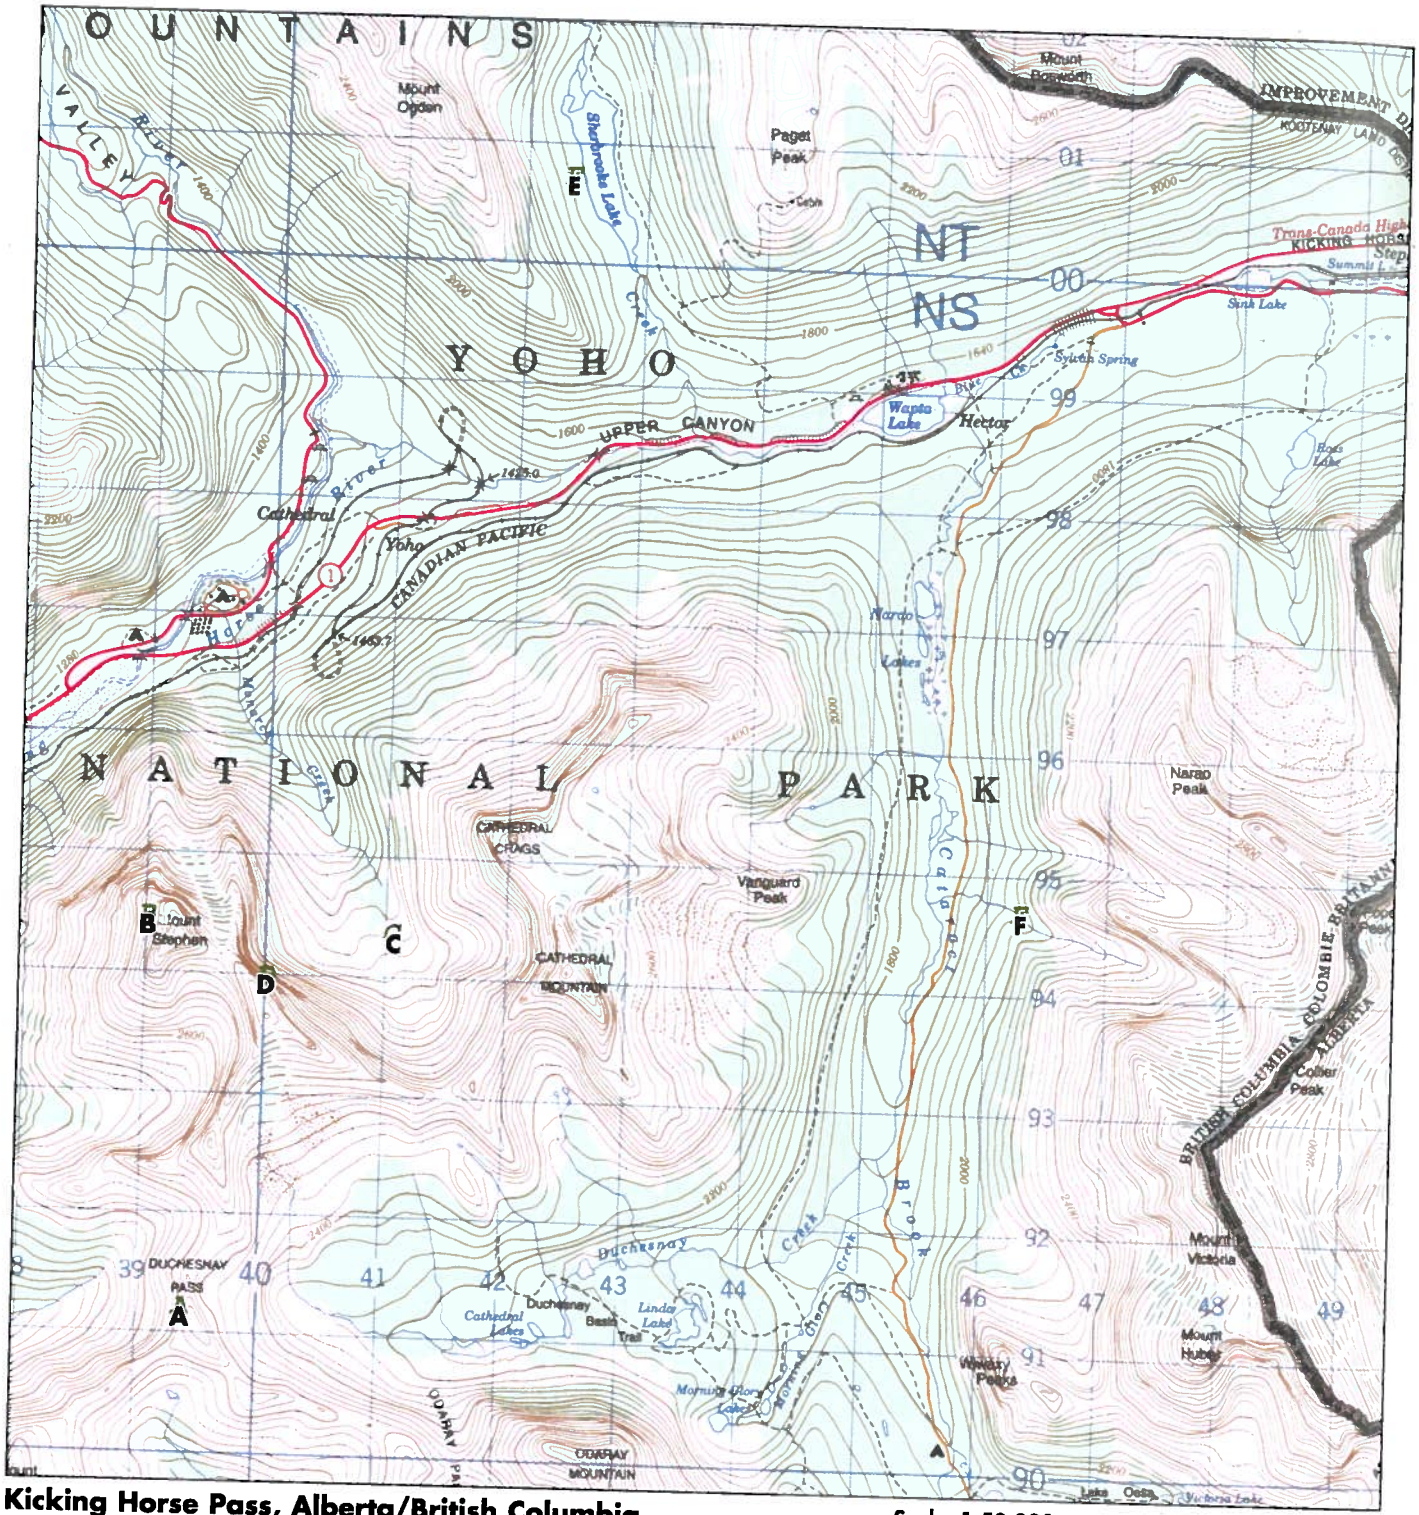
Figure 3.3.9b



Kicking Horse Pass, Alberta/British Columbia

* See legend on page 251

Scale: 1:50 000 **Contour interval: 40 metres**

1. Does this topographic map represent an area modified by alpine glaciation or ice sheets? How can you tell?
2. Was this region shaped by glacial erosion or deposition? How can you tell?
3. Identify the glacial features identified by the letters on the map.
4. The white areas on the map represent those parts of the landscape covered in snow cap. At what elevation is the snow line found at on the north side of Cathedral Mountain? On the south face? Account for these differences.
